

Catálogo de mariposas  
**Sinifaná - La Holanda**  
Titiribí, Antioquia

**Kim Garwood & Juan Guillermo Jaramillo V.**

# Convenciones

La taxonomía y la secuencia de este catálogo está basado en el Atlas of Neotropical lepidoptera, listado de chequeo parte 4A por Gerardo Lamas, 2004 y en [www.butterfliesofamerica.com](http://www.butterfliesofamerica.com)

La mayoría de fotos fueron tomadas a mariposas vivas en su ambiente natural. Las fotos de especímenes son usadas para mostrar algunas características que no son posibles fotografiar en la naturaleza o para mostrar especies de las cuales aún no tenemos ejemplares vivos, en ese caso ponemos una foto de esta especie tomada en otro país neotropical, indicando en la foto el país donde fue registrada con una abreviación de dos letras. Esta abreviación corresponde al código internacional usado como terminación en internet del código de cada país, ej. Brasil BR, Ecuador EC, Perú PE etc. Las especies fotografiadas en Colombia no tienen el código de país.

Debajo de la foto están el nombre científico y el rango de distribución de la especie con abreviación del nombre de los países de norte a sur, en algunos casos de con especies que están en Estados Unidos y México usamos el código de los estados más al sur donde están las especies TX Texas, CHI Chiapas.

Las fotos serán reemplazadas una vez se tome la foto de estas especies en Colombia, toda colaboración que permita completar el catalogo será bienvenida y el fotógrafo tendrá los créditos.

Nombres científicos con sp y el nombre de una localidad, tienen identificación desconocida, con duda o son especies sin describir por la ciencia, por favor si Usted puede ayudar a completar o corregir escribanos a los contactos.

## Advertencia

Este catálogo hace parte del Catálogo de mariposas de Colombia, es una versión preliminar en proceso de construcción y revisión, generado desde una base de datos, puede tener errores de taxonomía, de autores, de fotógrafos, de ortografía, de distribución geográfica y de códigos o duplicados que deben ser corregidos.

Al ser en un medio electrónico las correcciones son fáciles de hacer, no implican desperdicio de papel y se puede actualizar permanentemente.

Son bienvenidas todas las críticas, sugerencias y correcciones para mejorarlo y corregirlo.

Si desea colaborar tenemos una metodología para hacerlo por favor llame a Juan Guillermo Jaramillo V. al celular 57-3108306732 o escriba al correo [arcas1956@gmail.com](mailto:arcas1956@gmail.com) o a Kim Garwood [kimgarwd@sbcglobal.net](mailto:kimgarwd@sbcglobal.net) o [www.neotropicalbutterflies.com](http://www.neotropicalbutterflies.com)

Todos los errores son responsabilidad de Juan Guillermo Jaramillo V. y Kim Garwood.

## Conventions

Taxonomy and sequence of this catalog is based on the Atlas of Neotropical Lepidoptera, check list of Part 4A by Gerardo Lamas, 2004 and [www.butterfliesofamerica.com](http://www.butterfliesofamerica.com)

Most photos were taken of live butterflies in their natural environment. The photos of specimens are used to display some features that are not possible to photograph in nature. In some cases we have used photos taken in another neotropical country, and in these photos the other country is shown by a two letter abbreviation. This abbreviation corresponds to the international code used as internet country code, eg BR Brazil. The species photographed in Colombia do not have the country code.

Photos will be replaced once the picture is taken of these species in Colombia, any collaboration or contribution of photos that adds to the catalog will be welcome and all photographers will be credited.

Scientific names with the letters sp and the name of a town are used for unknown or unsure id's. If you can help with id's or corrections, please contact the authors.

## Warning

This catalog is part of the checklist of Colombian butterflies, it is a work in progress and is not complete. It is a preliminary version under construction and review, generated from a database. It may contains errors in taxonomy, author, photographers, spelling, geographical distribution and codes or duplicates that must be corrected.

Being an electronic medium, corrections are easy to make. There is nothing printed, and information and id's can be easily updated.

We welcome all criticisms, suggestions, and corrections to improve and correct this work.

If you want to help with this work, please contact Juan Guillermo Jaramillo at cellular 57-3108306732, email [arcas1956@gmail.com](mailto:arcas1956@gmail.com), or Kim Garwood, email [kimgpwd@sbcglobal.net](mailto:kimgpwd@sbcglobal.net) or [www.neotropicalbutterflies.com](http://www.neotropicalbutterflies.com), to learn about our methodology.

All errors are the responsibility of Juan Guillermo Jaramillo V. and Kim Garwood.

## Familias y subfamilias de mariposas

Las mariposas se clasifican en seis familias que agrupan especies con características comunes.

### Hesperiidae

Esta familia de mariposas primitivas tiene como característica las antenas con ganchito en la parte final. Tienen cabeza y cuerpo grueso y muchas tienen colores oscuros o cafés. 4 subfamilias.

**Eudaminae**  
Spreadwing skippers

**Pyrginae**  
Spreadwing skippers

**Pyrginae**  
Firetips

**Heteropterinae**  
Skipperlings

**Hesperiinae**  
Grass Skippers

## Butterfly families and subfamilies

The butterflies are classified into six families comprising species with common characteristics.

### Skippers

Mostly small with stout bodies, fast fliers, skipping or zipping flight. Many are brown or dark, drab colors. A large family, about 30% of all butterflies. Eudaminae and Pyrginae sit with wings spread open, Heteropterinae often sit with wings closed, Hesperiinae often sit in jet plane position. 4 subfamilies.

## Papilionidae

Mariposas grandes, muchas con colas. Vuelan con fortaleza y les gusta posarse en pantanos o zonas húmedas moviendo constantemente las alas. La mayoría son negras con rayas amarillas o negras con parches rojos en las alas posteriores. Las antenas tienen la parte final engrosada y curvada.

**Papilioninae**

**Swallowtails**

## Swallowtails

Mostly large butterflies, many with tails. Strong fliers, they like to mudpuddle on wet dirt with constantly moving, quivering wings. They are mostly black with yellow stripes or black with red patches on the hindwings (Parides). The antenna is bulky and curved at the end.

## Pieridae

La mayoría de pierides son amarillas, blancas o naranja, aunque hay algunas negras. Las pierides visitan flores y son comunes en jardines, pero las Dismorphias prefieren los bosques sombreados. Tienen 3 subfamilias.

**Dismorphiinae**  
Mimic-Whites

**Pierinae**

**Whites**

**Coliadinae**

**Sulphurs**

## Whites and sulphurs

Mostly white, yellow or orange, but some are black. Whites and Sulphurs like flowers and are often in gardens, but Dismorphiinae like the shaded forest. They have 3 subfamilies.

## Riodinidae

La mayoría de riodínidos se encuentran en tierras bajas, es una familia con mucha variedad. Muchas tienen manchas metálicas y se posan por debajo de las hojas. Algunas tienen colas. Tienen dos subfamilias.

## Metalmarks

More species are found in the lowlands. This is the most varied family; they can come in many shapes, sizes and colors. Some have tails, many do not. Some genera sit with wings closed, some with wings open. They pose under the leaves. They have 2 subfamilies.

Euselasiinae Metalmarks

Riodiniinae

Metalmarks

## Lycaenidae

En general los licénidos son mariposas pequeñas, muchas tienen colas pequeñas para distraer a los predadores. Son difíciles de ver pues muchas viven en el docel. A menudo son azules al abrir las alas. Tienen 2 subfamilias.

## Hairstreaks and blues

Hairstreaks often have tails, but not always. This is the least common of the 6 families, often in the canopy and hard to see. Small butterflies, often brilliant blue above. They have 2 subfamilies.

Polyommattinae Blues

Theclinae

Hairstreaks

## Nymphalidae

Las nifáidos solo tienen 4 patas visibles, las otras 2 están acortadas y cerca a la cabeza como escobas. Es la familia más abundante y representa 40% del total. Tiene 10 subfamilias.

## Brushfoots

Only show 4 walking legs, the front 2 legs are held up close to the head, like brushes. This is the largest family, about 40%, many subfamilies.

Heliconiinae  
Longwings

Nymphalinae  
Brushfoots Crescents

Limenitidinae  
Sisters

Charaxinae  
Leafwings

Apaturinae  
Emperors

Satyrinae  
Satyrs, Morphos

Danainae  
Clearwings

Danainae  
Monarchs

Cyrestinae  
Daggerwings

Biblidinae  
Tropicals

# Hesperiidae

## Skippers

### Eudaminae

#### Spreadwing Skippers

Se posan con las alas abiertas, muchas tienen colas y puntos o rayas en las alas delanteras.

Sit with wings open, many have tails and spots or stripes on the forewing.

## Heteropterinae

### Skipperlings

The Dallas – most sit with forewings up, like grass skippers. Often have large gold or orange patterns on underside. Found on wet dirt at higher elevations, some very high. Not in the lowlands. Many very confusing species.

# Pieridae

## Whites and Sulphurs

### Dismorphiinae

#### Mimic-Whites

Odd shaped forewings, smaller butterflies, prefer shaded areas. They are pale yellow or white with black marking on the dorsals. Females have rounder forewings. Sit with wings closed.

Pierinae

Whites

Variable, many are white but some are black with narrow white, yellow or even red patches. Many species of Catasticta are very difficult to separate from a live ventral photo. They like to come to wet sand or edges of flowing water. Sit with wings closed

*Perrhybris pamela*

## Coliadinae

### Sulphurs

Some large, but most are medium to smaller sizes. Common in meadows and gardens, roadside edges. Difficult to separate to species just on ventral live photos, you often need to see the pattern of the black on the edges of the upper wings. Sit with wings c

## Euselasiinae

### Metalmarks

Se posan casi siempre por debajo de las hojas en posición hacia abajo. De colores cafés y cremas.

They sit in the leaves in upright position. Brown and cream colors.

Este listado no es un índice, la numeración consecutiva sirve para contar las especies de la localidad, además el listado puede contener un número mayor de especies que el catálogo pues hay especies observadas, colectadas o reportadas en la literatura que no tienen aún fotos en la base de datos.

This list is not an index, the consecutive numbering is used to count the species of the locality, in addition the list may contain a greater number of species than the catalog as there are species observed, collected or reported in the literature that do not yet have photos in the database.

- 101 *Trina geometrino geometrino*
- 102 *Xenophanes tryxus*

## Papilionidae

### Papilioninae

- 103 *Battus ingenuus*
- 104 *Battus polydamas polydamas*
- 105 *Heraclides anchisiades idaeus*
- 106 *Heraclides androgeus epidauros*
- 107 *Heraclides isidorus flavencens*
- 108 *Heraclides paeon thrason*
- 109 *Heraclides thoas cinyras*
- 110 *Mimoides euryleon pithonius*
- 111 *Parides eurimedes*
- 112 *Parides sesostris tarquinios*
- 113 *Protesilaus glaucolaus glaucolaus*

## Pieridae

### Coliadinae

- 114 *Anteos clorinde*
- 115 *Eurema albula albula*
- 116 *Eurema arbela gratiosa*
- 117 *Eurema elathea vitellina*
- 118 *Eurema mexicana citrella*
- 119 *Phoebis argante argante*
- 120 *Phoebis philea philea*
- 121 *Phoebis sennae marcellina*
- 122 *Pyrisitia leuce athalia*
- 123 *Pyrisitia venusta venusta*
- 124 *Rhabdodryas trite trite*

### Dismorphiinae

- 125 *Lieinix nemesis nemesis*
- 126 *Pseudopieris nehemia*

### Pierinae

- 127 *Ascia monuste orseis*
- 128 *Ganyra phaloe*
- 129 *Melete lycimnia reducta*
- 130 *Perrhybris pamela*

## Riodinidae

### Euselasiinae

- 131 *Euselasia athena*

### Riodininae

- 132 *Ancyluris inca cacica*
- 133 *Anteros carausius carausius*
- 134 *Anteros formosus formosus*
- 135 *Baeotis zonata zonata*
- 136 *Calephelis iris*
- 137 *Calephelis sp sinifana*
- 138 *Calospila lucianus lucianus*
- 139 *Caria mantinea lampeto*
- 140 *Caria rhacotis*
- 141 *Detritivora hermodora*
- 142 *Emesis aurimna*
- 143 *Emesis brimo brimo*
- 144 *Emesis fatimella nobilita*
- 145 *Emesis mandana mandana*
- 146 *Emesis ocyptore aethalia*
- 147 *Emesis tegula*
- 148 *Esthemopsis clonia*
- 149 *Eurybia leucodopa*
- 150 *Eurybia lycisca*
- 151 *Hyphilaria thasus subrutila*
- 152 *Isapis agyrtus falcis*
- 153 *Lasaia agesilas agesilas*
- 154 *Lasaia arsis*
- 155 *Leucochimona lagora*
- 156 *Melanis electron*
- 157 *Melanis iarbas*
- 158 *Mesene phareus*
- 159 *Mesosemia telegone telegone*
- 160 *Napaea beltiana aza*
- 161 *Nothema erota*
- 162 *Ourocnemis archytas*
- 163 *Parcella amarynthina*
- 164 *Perophtalma tullius*
- 165 *Rhetus periander*
- 166 *Siseme neurodes neurodes*

## Lycaenidae

### Polyommatainae

- 167 *Cupido comyntas texana*
- 168 *Leptotes cassius*
- 169 *Zizula cyna*

## Theclinae

- 170 *Arawacus lincooides*
- 171 *Arzecla arza*
- 172 *Arzecla sp sinifana*
- 173 *Aubergina paetus*
- 174 *Calycopis calus*
