Como colaborar com o projeto borboletas do Brasil

Estamos preparando uma lista geral de borboletas Neotropicais organizadas por país, sendo o Brasil um dos principais países pela abundância de espécies.

O volume de informações para compilar uma lista útil de borboletas no Brasil é enorme e demorado, então qualquer ajuda que você possa nos dar será bem-vinda.

O modelo de lista de borboletas será muito semelhante à lista de borboletas colombiana que já está publicada e pode ser baixada em: <https://www.butterflycatalogs.com/>

Queremos convidar todos os que queiram colaborar neste projeto a enviar-nos os seus comentários e correções, dados onde podem nos ajudar a corrigir ou melhorar incluem:

- Espécies e subespécies ausentes do banco de dados
- Espécies e subespécies ausentes de um país ou região
- Subespécies que mudam no nível de espécie
- Sinônimos de nomes ou espécies que devem ser removidos da lista
- Erros de ortografia, autores, datas, parênteses
- Extensão ou alteração de intervalos gerais
- Alterações, sugestões ou erros na parte taxonômica
- Bibliografia a ser adicionada ou levada em consideração
- Bibliografia que fornece espécies que não temos cadastradas no Banco de Dados
- Bibliografia que altera a classificação de um táxon
- Correções, acréscimos ou sugestões para o texto e tabelas
- Fotos de espécies de cada país que usamos para fazer as capas do documento e dos diferentes capítulos (todas as fotos levam os créditos do fotógrafo)

Nosso objetivo final é fornecer uma lista com as espécies e subespécies de borboletas para cada país dos Neotrópicos de forma que sirva como ferramenta de educação, promoção e conservação regional.

How to collaborate with the Brazil butterfly's project

We are preparing a general list of Neotropical butterflies organized by country, with Brazil being one of the main countries for the abundance of species.

The volume of information to compile a useful list of butterflies in Brazil is huge and time consuming, so any help you can give us would be greatly appreciated.

The butterfly list model will be very similar to the one for butterflies in Colombia, which is already published and can be downloaded at: <https://www.butterflycatalogs.com/>

We want to invite anyone who wants to collaborate in this project to send us their comments and corrections. Data where they can help us correct or improve include:

- Species and subspecies missing from the database
- Species and subspecies missing from a country or region
- Subspecies that change at the species level
- Synonyms of names, or species that must be removed from the list
- Errors in spelling, authors, dates, parentheses
- Expansion or change of general ranges
- Changes, suggestions or errors in the taxonomic part
- Bibliography to be added or taken into account
- Bibliography that contributes species that we do not have registered in the Database
- Bibliography that changes the range for a taxon
- Corrections, extensions or suggestions for the text and tables
- Photos of species from each country that we use to make the covers of the document and the different chapters (all photos bear the credits of the photographer)

Our final goal is to deliver a list with the species and subspecies of butterflies for each country of the Neotropics in such a way that it serves as a tool for education, promotion and regional conservation.

Embora as informações de cada país estejam na lista geral, atualmente o BioButterfly Database pode gerar a lista independente para cada país, do México à Argentina, (os países do Caribe estão disponíveis apenas individualmente no momento Cuba, Hispaniola e Trinidad e Tobago). alguém requer a lista específica de um país, eles podem solicitá-la de nós. Estas listas preliminares não serão completas e são identificadas por terem capas com selos de borboletas de diferentes países.

Antes de publicar em nossa página <https://www.butterflycatalogs.com/> a lista independente e completa de cada país, queremos que as informações sejam mais completas, por isso convidamos quem quiser patrocinar um país a entrar em contato conosco, essa ajuda é essencial. Temos uma metodologia que nos permite coletar e fazer alterações rapidamente. Além disso, por ser uma publicação eletrônica, pode ser modificada de forma rápida e sem custo.

Entre em contato com Kim Garwood ou Juan Guillermo Jaramillo para coordenar a colaboração, disponibilizamos nosso tempo e disposição para continuar este trabalho gratuitamente. Nossa maneira de trabalhar consiste em compartilhar informações com o maior número de pessoas possível, para completá-las, melhorá-las e compartilhá-las novamente. Preferimos ter e compartilhar informações com uma porcentagem de informações erradas ou incompletas do que manter as informações nos discos de nossos computadores.

Kim Garwood: kimgrwd@sbcglobal.net

Juan Guillermo Jaramillo: arcas1956@gmail.com

Para citar este documento use a referência: Lista de verificação de borboletas dos neotrópicos América do Sul

Esta listagem é um rascunho, está em construção, ajude-nos a melhorá-la

Although the information of each country will be in the general list, currently BioButterfly Database can generate the independent list for each country, from Mexico to Argentina, (Caribbean countries are only available individually at the moment Cuba, Hispaniola and Trinidad and Tobago) so If someone requires a specific list of a country, they can request it. These preliminary listings will not be complete and are identified by having covers with stamps of butterflies from different countries.

Before publishing on our page <https://www.butterflycatalogs.com/> the independent and complete list of each country we want the information to be more complete, so we invite anyone who wants to sponsor a country to contact us, this help is essential. We have a methodology that allows us to collect and make changes quickly. Furthermore, as it is an electronic publication, it can be modified quickly and at no cost.

Contact Kim Garwood or Juan Guillermo Jaramillo to coordinate the collaboration, we make our time and willingness to continue this work for free. Our way of working is to share the information with as many people as possible, to complete it, improve it and share it again. We prefer to have and share information with a percentage of wrong or incomplete information rather than keep the information on the disks of our computers.

Bibliografia

A região Neotropical, devido a sua diversidade de borboletas, possui muitas informações publicadas em livros e revistas especializadas, essas informações nos ajudaram a construir o catálogo do Banco de Dados BioButterfly e identificar muitas de nossas fotos.

Inicialmente estávamos colocando a bibliografia em cada PDF tentando associar os artigos relevantes a cada PDF específico, basicamente se relacionado a uma família, um país ou uma localidade. Decidimos fazer uma bibliografia geral combinada em PDF separada com citações para todas as publicações que usamos de forma que seja útil para todos os nossos PDFs e, ao mesmo tempo, libere espaço em todos os PDFs.

Com o seguinte link acesse o PDF com a bibliografia:

<https://www.butterflycatalogs.com/neotropical-bibliography.html>

Se você quiser se aprofundar na bibliografia dos Neotrópicos, com artigos sobre borboletas do México à Argentina, recomendamos um excelente documento compilado pelo Dr. Gerardo Lamas 2022 encontrado na página Butterflies of America BOA chamado: **An Annotated Bibliography of the Neotropical Butterflies e Skippers (Lepidoptera: Papilionoidea e Hesperioidea) Edição Eletrônica Revisada** que pode ser consultada no seguinte link:

<http://www.butterfliesofamerica.com/L/Biblio.htm>

Estamos constantemente em busca de informações que nos ajudem a completar o banco de dados, especialmente mudanças na taxonomia de espécies, espécies novas e espécies por país ou região. Agradecemos todas as referências que nos possam enviar.

Bibliography

The Neotropics, due to its diversity of butterflies, have a lot of information published in books and specialized magazines. This information has helped us to build the BioButterfly Database catalog and to identify many of our photos.

Initially we were placing the bibliography in each PDF trying to associate the relevant articles to each specific PDF, basically if it related to a family, a country or a locality. We decided to make a general combined bibliography as a separate PDF with citations for all the publications we have been using in such a way that it is useful for all our PDFs and at the same time it frees up space in all the PDFs.

With this link access the PDF with the bibliography:

<https://www.butterflycatalogs.com/neotropical-bibliography.html>

If you want to delve into the Neotropical bibliography, with articles on butterflies from Mexico to Argentina, we recommend an excellent document compiled by Dr. Gerardo Lamas 2022 found on the Butterflies of America BOA page called: **An Annotated Bibliography of the Neotropical Butterflies and Skippers (Lepidoptera: Papilionoidea and Hesperioidea) Revised Electronic Edition** which can be consulted at the following link:

<http://www.butterfliesofamerica.com/L/Biblio.htm>

We are constantly looking for information to help us complete the database, especially changes in the taxonomy of species, new species and species by country or region. We appreciate all the references that you can send us.

Este guia é um legado porque vários dos sítios onde as espécies foram registradas já estão destruídos e, portanto, essas espécies não existem mais naquela localidade específica. A lista de verificação e o guia ilustram a incrível diversidade de borboletas nos Neotrópicos para motivar seu conhecimento e conservação.

“So podemos conservar e proteger o que sabemos”

This guide is a legacy because several of the sites where the species were recorded have already been destroyed and therefore these species no longer exist in that specific locality. The checklist and the guide illustrate the amazing diversity of butterflies in the Neotropics to motivate their knowledge and conservation.

“We can only conserve and protect what we know” J.G.J

Checklist Butterflies of **Brazil**
