## Introducción

Con el propósito fundamental de hacer educación y crear conciencia sobre la importancia de las mariposas en el ecosistema y su necesidad de conservarlas hemos recopilado información en la base de datos BioButterfly.

Con esta base de datos elaboramos catálogos, listados y guías de mariposas, tanto para todo el Neotrópico como para países y localidades desde México hasta Argentina.

La lista numerada con las especies y subespecies en el país tiene la información que hemos podido recopilar hasta el momento, basada en las publicaciones científicas y los registros fotográficos de muchísimos colaboradores.

Las guías contienen fotografías que han recopilado y tomado los autores y otros 378 fotógrafos quienes desinteresadamente nos las han cedido para nuestro trabajo. Por ello al final de este documento tenemos un listado completo de todos aquellos que han contribuido con sus fotos. Estas fotografías representan miles de horas de trabajo de campo que de otra manera hubiera sido casi imposible de recopilar.

Esta información está en constante evolución y cambio por eso creemos que las versiones electrónicas son la mejor opción, pues al poder generar listados y guías sin costo de impresión cada que se quiera puede ser el mecanismo más práctico para recopilar y compartir la información sobre las mariposas neotropicales.

Para la presentación y diagramación del documento escogimos un formato entre científico y didáctico pues, aunque la información es muy científica, el uso de fotos ayuda a atraer público general y este es parte del objetivo: comunicar para educar y conservar.

Esperamos que esta información sea de utilidad al aumentar el conocimiento sobre las mariposas y que ayude a fomentar la observación, estudio, fotografía y disfrute de estas y que la información pueda ser utilizada por gobiernos, instituciones o personas para tomar decisiones y crear conciencia sobre la necesidad de su estudio y conservación.

## Introduction

With the fundamental purpose of educating and raising awareness about the importance of butterflies in the ecosystem and the need to conserve them, we have compiled information in the BioButterfly database.

With this database we create butterfly catalogs, lists, and guides, both for the entire Neotropics and for countries and localities from Mexico to Argentina.

The numbered list with the species and subspecies in the country has the information that we have been able to collect so far, based on scientific publications and the photographic records of many collaborators.

The guides contain photographs that have been compiled and taken by the authors and 378 other photographers who selflessly have given them up for our work. That is why at the end of this document we have a complete list of all those who have contributed their photos. These photographs represent thousands of hours of fieldwork that would otherwise have been nearly impossible to collect.

This information is constantly evolving and changing, which is why we believe that the electronic versions are the best option, because by being able to generate lists and guides without printing costs whenever you want, it can be the most practical mechanism for collecting and sharing information about neotropical butterflies.

For the presentation and layout of the document we chose a format between scientific and didactic because, although the information is very scientific, the use of photos helps to attract the public, and this is part of the objective: to communicate to educate and conserve.

We hope that this information will be useful in increasing knowledge about butterflies and that it will help promote the observation, study, photography, and enjoyment of these, and that the information can be used by governments, institutions, or individuals to make decisions and raise awareness about the need for its study and conservation

## Como colaborar con el proyecto mariposas del neotrópico

Estamos elaborando un listado general de las mariposas del neotrópico organizado por país, serán tres PDF que colocaremos sin costo en nuestras páginas web, inicialmente publicaremos los países de Sur América, luego México - Panamá y las Islas del Caribe.

El volumen de información para recopilar un listado útil de mariposas del neotrópico es abrumador y demanda mucho tiempo, por ello, cualquier ayuda que nos puedan brindar será bienvenida.

El modelo de listado de mariposas será muy similar al de mariposas de Colombia que ya está publicado y se puede descargar en: <https://www.butterflycatalogs.com/>

Queremos invitar a todo aquel que quiera colaborar en este proyecto a que nos envíe sus comentarios y correcciones, datos donde nos pueden ayudar a corregir o mejorar incluyen:

- Especies y subespecies que faltan en la base de datos
- Especies y subespecies que faltan en un país o región
- Subespecies que cambian al nivel de especies
- Sinónimos de nombres, o especies que deben salir del listado
- Errores de ortografía, de autores, de fechas, de paréntesis
- Ampliación o cambio de rangos generales
- Cambios, sugerencias o errores en la parte taxonómica
- Bibliografía que se debe agregar o tener en cuenta
- Bibliografía que aporte especies que no tenemos registradas en la Base de Datos
- Bibliografía que cambie el rango para un taxón
- Correcciones, ampliaciones o sugerencias para el texto y las tablas
- Fotos de especies de cada país que nos sirvan para hacer las caratulas del documento y de los diferentes capítulos (todas las fotos llevan los créditos del fotógrafo)

## How to collaborate with the neotropic butterflies project

We are preparing a general list of the Neotropical butterflies organized by country. There will be three PDFs that we will place free of charge on our web pages, initially we will publish the countries of South America, then Mexico - Panama and the Caribbean Islands.

The volume of information to compile a useful list of Neotropical butterflies is overwhelming and time-consuming, so any help you can give us is welcome.

The butterfly list model will be very similar to the one for butterflies in Colombia, which is already published and can be downloaded at: <https://www.butterflycatalogs.com/>

We want to invite anyone who wants to collaborate in this project to send us their comments and corrections. Data where they can help us correct or improve include:

- Species and subspecies missing from the database
- Species and subspecies missing from a country or region
- Subspecies that change at the species level
- Synonyms of names, or species that must be removed from the list
- Errors in spelling, authors, dates, parentheses
- Expansion or change of general ranges
- Changes, suggestions or errors in the taxonomic part
- Bibliography to be added or taken into account
- Bibliography that contributes species that we do not have registered in the Database
- Bibliography that changes the range for a taxon
- Corrections, extensions or suggestions for the text and tables
- Photos of species from each country that we use to make the covers of the document and the different chapters (all photos bear the credits of the photographer)

Our final goal is to deliver a list with the species and subspecies of butterflies for each country of the Neotropics in such a way that it serves as a

Nuestra meta final es entregar un listado con las especies y subespecies de mariposas para cada país del neotrópico de tal manera que sirva de herramienta de educación, promoción y conservación regional.

Aunque la información de cada país estará en el listado general, actualmente BioButterfly Database puede generar el listado independiente para cada país, desde México a Argentina, (países del Caribe solo están disponibles individualmente por el momento Cuba, Hispaniola y Trinidad y Tobago) así que si alguien requiere el listado específico de un país nos lo puede solicitar. Estos listados preliminares no estarán completos, y se identifican por tener caratulas con estampillas de mariposas de diferentes países.

Antes de publicar en nuestra página <https://www.butterflycatalogs.com/> el listado independiente y completo de cada país queremos que la información esté más completa así que invitamos a quien quiera apadrinar un país a que nos contacte, esta ayuda es fundamental. Tenemos una metodología que nos permite recopilar y hacer los cambios rápidamente. Además, al ser una publicación electrónica puede ser modificada rápido y sin costo.

Comuníquese con Kim Garwood o Juan Guillermo Jaramillo para coordinar la colaboración, ponemos a disposición nuestro tiempo y la voluntad de continuar gratis con este trabajo. Nuestra manera de trabajar consiste en compartir con la mayor cantidad de personas la información, para completarla, mejorarla y volver a compartir, preferimos tener y compartir información con un porcentaje de información equivocada o incompleta a quedarnos con la información en los discos de nuestros computadores.

Kim Garwood: [kimgrwd@sbcglobal.net](mailto:kimgrwd@sbcglobal.net)

Juan Guillermo Jaramillo: [arcas1956@gmail.com](mailto:arcas1956@gmail.com)

**Este listado es un borrador, está en construcción, ayúdenos a mejorarlo**

tool for education, promotion and regional conservation.

Although the information of each country will be in the general list, currently BioButterfly Database can generate the independent list for each country, from Mexico to Argentina, (Caribbean countries are only available individually at the moment Cuba, Hispaniola and Trinidad and Tobago) so If someone requires a specific list of a country, they can request it. These preliminary listings will not be complete and are identified by having covers with stamps of butterflies from different countries.

Before publishing on our page <https://www.butterflycatalogs.com/> the independent and complete list of each country we want the information to be more complete, so we invite anyone who wants to sponsor a country to contact us, this help is essential. We have a methodology that allows us to collect and make changes quickly. Furthermore, as it is an electronic publication, it can be modified quickly and at no cost.

Contact Kim Garwood or Juan Guillermo Jaramillo to coordinate the collaboration, we make our time and willingness to continue this work for free. Our way of working is to share the information with as many people as possible, to complete it, improve it and share it again. We prefer to have and share information with a percentage of wrong or incomplete information rather than keep the information on the disks of our computers.

## Bibliografía

El Neotrópico por su diversidad de mariposas tiene mucha información publicada en libros y revistas especializadas, esta información nos ha ayudado a construir el catálogo de BioButterfly Database y a identificar muchas de nuestras fotos.

Inicialmente estábamos colocando la bibliografía en cada PDF tratando de asociar los artículos relevantes a cada PDF específico, básicamente si se relaciona con una familia, un país o una localidad. Decidimos hacer una bibliografía general combinada en formato PDF independiente con citas para todas las publicaciones que hemos estado usando de tal manera que sea útil para todos nuestros PDF y al mismo tiempo libere espacio en todos los PDF.

Con el siguiente vínculo acceda al PDF con la bibliografía.:

<https://www.butterflycatalogs.com/neotropical-bibliography.html>

Si se quiere profundizar en la bibliografía del Neotrópico, con artículos de mariposas desde México hasta Argentina, recomendamos un excelente documento recopilado por el Dr. Gerardo Lamas 2022 que se encuentra en la página de Butterflies of America BOA llamado: **An Annotated Bibliography of the Neotropical Butterflies and Skippers (Lepidoptera: Papilionoidea and Hesperioidea) Revised Electronic Edition** que se puede consultar en el siguiente vínculo:

<http://www.butterfliesofamerica.com/L/Biblio.htm>

Permanentemente estamos buscando información que nos ayude a completar la base de datos, especialmente cambios en la taxonomía de las especies, nuevas especies y especies por país o regiones. Agradecemos todas las referencias que nos puedan enviar.

## Bibliography

The Neotropics, due to its diversity of butterflies, have a lot of information published in books and specialized magazines. This information has helped us to build the BioButterfly Database catalog and to identify many of our photos.

Initially we were placing the bibliography in each PDF trying to associate the relevant articles to each specific PDF, basically if it related to a family, a country or a locality. We decided to make a general combined bibliography as a separate PDF with citations for all the publications we have been using in such a way that it is useful for all our PDFs and at the same time it frees up space in all the PDFs.

With this link access the PDF with the bibliography:

<https://www.butterflycatalogs.com/neotropical-bibliography.html>

If you want to delve into the Neotropical bibliography, with articles on butterflies from Mexico to Argentina, we recommend an excellent document compiled by Dr. Gerardo Lamas 2022 found on the Butterflies of America BOA page called: **An Annotated Bibliography of the Neotropical Butterflies and Skippers (Lepidoptera: Papilionoidea and Hesperioidea) Revised Electronic Edition** which can be consulted at the following link:

<http://www.butterfliesofamerica.com/L/Biblio.htm>

We are constantly looking for information to help us complete the database, especially changes in the taxonomy of species, new species and species by country or region. We appreciate all the references that you can send us.

## Páginas web recomendadas

Existen muchísimas fuentes de información sobre mariposas en Internet, sin embargo, presentamos acá una selección de aquellas recomendadas que puedan dar información complementaria a la bibliografía, las listas de chequeo o las guías, o pueden tener información útil para la identificación o el conocimiento de las mariposas.

### Identificación de mariposas - **Butterfly identification**

## Agradecimientos

Estas guías y listados de chequeo son el resultado del esfuerzo de un gran número de colaboradores, científicos, aficionados y fotógrafos a quienes damos las gracias, pues sin ellos, estas publicaciones no hubieran sido posible de completar.

En la familia Hesperidae agradecemos especialmente al experto Bernard Hermier por las innumerables horas y páginas de explicaciones y correcciones sin las cuales habría sido imposible hacer este documento. Al Dr. Keith Willmott por sus consejos en la elaboración de estos trabajos e identificación de fotos. A Jean-Claude Petit por las múltiples adiciones de especies y correcciones para Ecuador. Al Dr Gerardo Lamas y Mike McInnis por la información sobre el parque nacional del Manu.

Agradecemos a los siguientes expertos que generosamente han ayudado con información y en la identificación de algunas fotos que han servido de soporte al listado (en orden alfabético): Stéphane Attal, Dr. Andrew Brower, Prof. James Mallet, Andrew Neild, Gregory Nielsen, Dr. Tomasz Pyrcz, Dr. Robert Robbins, Julián Salazar y Aaron Soh.

A Andrés Arenas por sus consejos y ayuda en la elaboración de la base de datos. A Andrew Neild por sus recomendaciones y sugerencias. A David Geale por sus innumerables aportes fotográficos.

A Blanca Huertas y Cristóbal Ríos-Málaver compañeros en el listado de Colombia que fue la primera piedra para este trabajo. A Gabriel Rodríguez por sus recomendaciones y por los múltiples datos geográficos de su colección de mariposas. Al Dr. Juan José Arango, Rodrigo Bernal y Daniel Jaramillo F. por sus consejos y colaboración en la consecución de datos. A Maristela Zamoner por la traducción al portugués.

Al Museo de Historia Natural de Londres (Natural History Museum) y al McGuire Center de la Universidad de la Florida por permitirnos el acceso a sus colecciones, ejemplares y datos. A Blanca Huertas por todos sus consejos y recomendaciones.

Especial agradecimiento a las familias de los autores, por su apoyo durante la realización de este proyecto.

## Acknowledgments

These guides and checklist are the result of the effort of many collaborators, scientists, fans and photographers to whom we thank, because without them, these publications would not have been possible to complete.

In the Hesperidae family we especially thank the expert Bernard Hermier for the countless hours and pages of explanations and corrections without which it would have been impossible to make this document. To Dr. Keith Willmott for his advice in the preparation of these works and identification of photos. To Jean-Claude Petit for the multiple additions of species and corrections for Ecuador. To Dr Gerardo Lamas and Mike McInnis for the information on the Manu National Park.

We thank the following experts who have generously helped with information and in the identification of some photos that have served as support for the list (in alphabetical order): Stéphane Attal, Dr. Andrew Brower, Prof. James Mallet, Andrew Neild, Gregory Nielsen, Dr. Tomasz Pyrcz, Dr. Robert Robbins, Julián Salazar and Aaron Soh.

To Andrés Arenas for his advice and help in preparing the database. To Andrew Neild for his recommendations and suggestions. To David Geale for his countless photographic contributions.

To Blanca Huertas and Cristóbal Ríos-Málaver, colleagues on the Colombian list, which was the first stone for this work. To Gabriel Rodríguez for his recommendations and for the multiple geographical data of his collection of butterflies. To Dr. Juan José Arango, Rodrigo Bernal and Daniel Jaramillo F. for their advice and collaboration in obtaining data. To Maristela Zamoner for the portuguese translation.

To the Natural History Museum of London and the McGuire Center from the University of Florida for allowing us access to their collections, specimens and data. To Blanca Huertas for all her advice and recommendations.

Special thanks to the families of the authors, for their support during the realization of this project.

## Guías y listados de chequeo

En <https://www.butterflycatalogs.com/> se pueden descargar gratis los listados o guías de mariposas del Neotrópico, Brasil, Colombia, Ecuador, Perú y Bolivia. O solicitar a los autores un listado o guía específico para países desde México hasta Argentina.

## Guides & Checklists

At <https://www.butterflycatalogs.com/> you can download free butterfly checklists or guides for the Neotropics, Brazil, Colombia, Ecuador, Peru and Bolivia. Or ask the authors for a specific list or guide for countries from Mexico to Argentina.

Descargue gratis en nuestra página web <https://www.butterflycatalogs.com/>

Free downloading in our web page:

Esta guía es un legado porque varios de los sitios donde fueron registradas las especies ya están destruidos y por lo tanto estas especies ya no existen en esa localidad específica. El listado y la guía ilustran la asombrosa diversidad de mariposas del Neotrópico para motivar su conocimiento y conservación.

“Solo podemos conservar y proteger lo que conocemos”

This guide is a legacy because several of the sites where the species were recorded have already been destroyed and therefore these species no longer exist in that specific locality. The checklists and the guides illustrate the amazing diversity of butterflies of the Neotropics to motivate their knowledge and conservation.

“We can only conserve and protect what we know” JGJ
